Introduction to Generative AI with AWS Project Documentation Report

Visit [UDACITY Introduction to Generative AI with AWS Project Documentation Report](#) to make a copy of this document.

Complete the answers to the questions below to complete your project report. Create a PDF of the completed document and submit the PDF with your project.

Question	Your answer:
Step 2: Domain Choice What domain did you choose to fine-tune the Meta Llama 2 7B model on? Choices: 1. Financial 2. Healthcare 3. IT	2. Healthcare
Step 3: Model Evaluation Section What was the response of the model to your domain-specific input in the model_evaluation.ipynb file?	"the development of new therapies for the treatment of neurodegenerative diseases. In the field of neurodegenerative diseases, the study of the molecular mechanisms involved in the progression of the disease and the identification of new therapeutic targets is essential to improve the"
Step 4: Fine-Tuning Section After fine-tuning the model, what was the response of the model to your domain-specific input in the model_finetuning.ipynb file?	"' the identification of novel genes that are potentially involved in the pathogenesis of diseases. Genomic characterization also allows the identification of novel genes that are potentially involved in the pathogenesis of diseases. This is a critical step in the development of novel therapeutic strategies."
